

HEALTH FUND

COMMUNITY ENGAGEMENT TOOLKIT

COMMUNITY VOICE

Input from those being served by programs, and/or with lived experience of or otherwise impacted by a health issue.

Our priority is to support projects that clearly and intentionally involve individuals being served in the planning, design, implementation, and/or evaluation of the initiative, as well as the broader community.

Below you'll find tools created to help applicants for Health Fund grants incorporate community engagement and community voice into the design of their proposed projects.

COMMUNITY ENGAGEMENT PLANNING TOOL

The planning tool serves as a template for how to incorporate an effective community engagement plan into proposals and programming.
